## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 9-11 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent 6,683,887 (hereinafter referred as “Huang”).

**Regarding claims 9-11 and 14,** Huang discloses a method for multicasting data comprising:

- (a) receiving at a line card multicast data and an indication of a plurality of destinations for the multicast data (see Fig. 1, elements 2 and 4, col. 5, lines 51-67);
- (b) transferring the multicast data over a common bus (see Fig. 1, elements 2 or 4) to a plurality of digital subscriber line chipsets associated with the plurality of destinations (see Fig. 1, elements 24-40) by:

- (b1) selecting two or more of the plurality of digital subscriber line chipsets to receive multicast data (see Fig. 1, col. 2, lines 28-36, and col. 3, lines 1-9);
  - (b2) enabling the two or more selected digital subscriber line chipsets to receive the multicast data (see Fig. 1, col. 2, lines 28-36, and col. 3, lines 10-24); and

(b3) transferring the multicast data over the common bus to the selected digital subscriber line chipsets after selection and enabling of the two or more of the plurality of digital subscriber line chipsets (see col. 2, lines 37-43).

***Allowable Subject Matter***

3. Claims 12, 13, and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Claims 1-8 and 16-28 are allowed.

***Response to Arguments***

5. Applicant's arguments with respect to claims 9-11 and 14 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phirin Sam whose telephone number is (571) 272-3082. The examiner can normally be reached on a compress schedule, from 8:00-5:30, first Wed off.
